

INSTALLATION OPTIONS

IN GROUND

- 1 x 4m strong steel pole
- 1 x Secure in ground spike
- 600mm in ground spike
- Requires access to the ground
- Can't be installed on concrete

ABOVE GROUND

- 1 x 4m strong steel pivoting pole
- 1 x Above ground, weighted modular steel base, forkliftable
- Weights approx. 450kg
- Size of base is that of a standard pallet
- Ground needs to be flat and sturdy to hold the weight

AI SMART MOTION DETECTION

Our AI motion detection technology helps focus on humans and vehicles. The device will only trigger an alarm when the preset intrusion type (human or vehicle) takes place. Videos related to the alarm events are then sorted into human and vehicle categories for easier footage searches.

PROGRAMMABLE TRIGGER ZONES

As each site has different conditions, 1300SiteCam can customize trigger detection zones to provide accurate detection of intrusion events.

SECURITY MONITORING

1300SiteCam can provide 24/7 site monitoring. If this is of interest, please contact us for further information.

OPTIONAL ADD ONS

TIME LAPSE

Photos are captured (usually every 30minutes) and saved to the Cloud server. When required these photos are put together into a Time Lapse video. Time lapse functionality can be put on hold and restarted when required.

SITE SECURITY PROTECTION

HIRE and SALE options available

View your properties anywhere, anytime!

We strive to offer the best in Site Security Services for both hire and sales. Our Solar/Wireless Security Camera Systems can monitor and protect your site and assets.

With 24/7 visibility, take control and reduce your risk of theft and crime. Whatever your site requirements, we have a camera to suit your needs with both in ground and above ground installation options available.

Double Turret

DETECTION & COVERAGE RANGE

SINGLE TURRET

For single site applications.
Provides coverage to both sides of a fence.

DOUBLE TURRET

Ideal in narrow walkways, site entrance gates and site offices,
when you need to monitor two different directions.

180° / 360° CAMERA

180° Single Camera

360° Double Camera

180° CAMERA

For large areas and along fence lines.

360° CAMERA

For sites that require all-round vision.

PT CAMERA

Our 'Pan and Tilt' camera provides the function to control the camera view from an app using your smart phone or tablet.

With all the quality features of our other cameras, it also has the capability to be panned and tilted all around the pole. Allowing you better vision and the flexibility to view any angle, for any detail, at any time.

PT CAMERA

For stable positions to monitor yards and construction site progress.

ColorVu

ColorVu Technology enables cameras to produce colorful videos even in extremely dimly lit environments. It's large aperture provides vivid and colorful images even in low light, prevents reflections and loss of details caused by infrared lighting and over exposure.
