

NOISE REDUCTION BARRIERS

(ACOUSTIC CURTAINS)

Noise reduction barriers or as they are otherwise known, acoustic curtains are the ideal solution to protect employees and local communities from the harmful effects of excessive noise.

Designed using world-leading acoustic technology they are made from high quality, lightweight, water-resistant PVC. Providing the most effective temporary sound solution, they have become an essential element on construction and building sites to mitigate noise pollution emanating from your site, remain compliant and ensure noisy works can continue – even after hours!

Built with both sound reflecting and absorbing material with added acoustic felt to reduce sound reverberation. Our premium barriers are also low centered to ensure noise can't penetrate beneath and with a strong insulated core they provide up to 18 decibels of sound absorption performance.

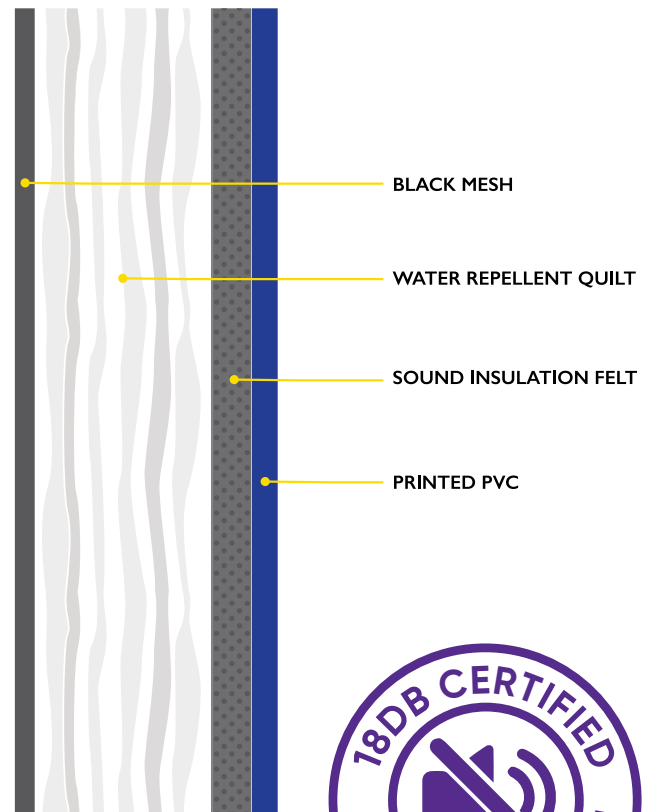

Ideal on Temporary Fence, permanent fence or scaffold via heavy duty cable ties, the overlapping Velcro ensure a tight seal to prevent noise passing through.

Benefits:

- Work in public spaces – reduce the noise impact on workers, residents and passers-by
- Use bigger machinery, with greater efficiency
- Conduct night works
- Reduce event generator noise
- Control dust and fumes on site
- Indoor & outdoor

Suitable for:

- Road & Rail
- Demolition
- Construction
- Events
- Mining
- Utilities
