ABOUT US

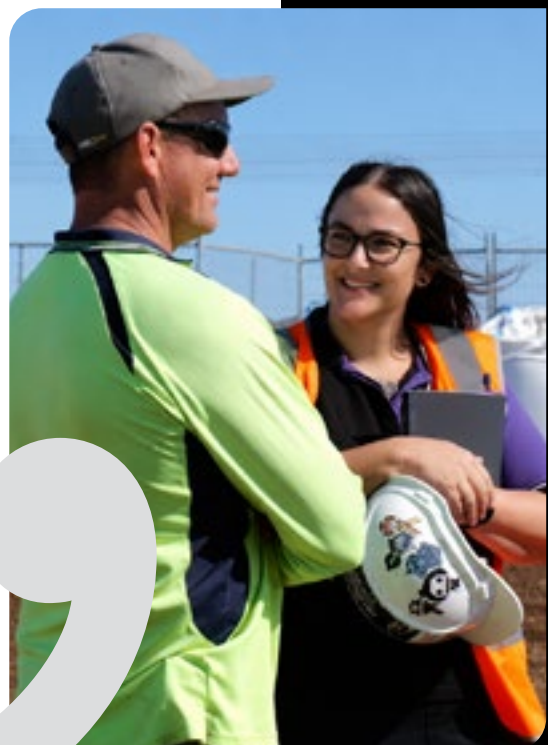

1300TempFence is Australia's preferred specialist in temporary fence hire. Backed by over 25 years experience in the industry, we offer complete site solutions alongside competitive prices, fast reliable service and industry leading products.

We ensure that our customers can get their job done in a safe and secure environment. Whether you work in; infrastructure, civil, events, residential, government, commercial, landscaping, industrial or demolition our goal is to provide a service that makes your job or event run that little bit smoother. With our vast experience, we know exactly what works on site. All our products are fully compliant to Australian Standards.

OUR PROMISE: *PEACE OF MIND*

Peace of Mind is the confidence that your site, project and people are supported by a team you can rely on. Through safe, compliant solutions, dependable service and a commitment to delivering on our promises, we help our customers keep their projects moving safely and smoothly.

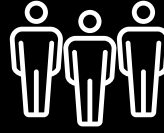

OUR VALUES

INNOVATION

Harness our drive and passion to continually question everything we do. Challenge, change and commit.

TEAMWORK

Together we will challenge and support, collaborating on the things that will make a difference.

OUR FOUNDATION

Treat everyone as we want to be treated, with honesty, integrity and respect.

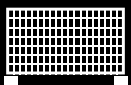

CUSTOMER

Being truly service focused, offering value and solutions and striving for 100% satisfaction is essential.

TEMPORARY FENCING

Temporary fence is vital when it comes to managing and protecting your work site or event. Whether the need is to prevent the public from entering a hazardous site, limiting access, providing security, or ensuring health and safety requirements are met, we have a temporary fencing solution to help you. Our fencing has been specially designed and engineered to perform on any major project or large scale event to ensure safety and compliance.

With our unwavering commitment to OH&S and use of quality products we can provide unrivalled site security and safety solutions.

CAPABILITIES INCLUDE:

- Any size site, any hire period
- Fully engineered systems
- Night & weekend works

PROJECTS INCLUDE:

- Events
- Road & rail
- Water
- Bridges
- Ports
- Tunnels
- Energy
- Airports
- Sewers
- Telecommunications

OUR STANDARD PANEL DETAILS FOR VIC, NSW & ACT:

Panel size	3300mm (W) x 2100mm (H)
Frame	32mm O.D. 2mm pipe wall thickness
Infill mesh	4mm x 4mm, 150mm x 60mm spacings
Weight	30kg
Finish	Galvanised

OUR STANDARD PANEL DETAILS FOR WA, QLD & SA

Panel size	2400mm (W) x 2100mm (H)
Frame	32mm O.D. 2mm pipe wall thickness
Infill mesh	4mm x 4mm, 150mm x 60mm spacings
Weight	22kg
Finish	Galvanised

ACCESSORIES & ADD-ONS

STAYS

Providing extra bracing strength and anchors to help prevent temporary fence from falling. See next page for further detail.

DOG BARS

Ideal for containing animals in a fenced area. Also prevents kids/balls going under fencing.

HAND RAILS

Reduce the potential trip hazard from fence feet protruding into pedestrian traffic areas.

GATE WHEELS

Attach to pedestrian gates or panels, allowing gates to be opened and closed more easily.

BARBED WIRE

1, 2 & 3 rows are available. Made to the highest standards, using premium grade wire.

PEDESTRIAN GATE

Provides personnel entrances and exits to your temporary fence installations.

NEW PRODUCT

TEMPORARY DOUBLE SLIDING GATES

A practical access solution for vehicles, equipment and workers, ideal for sites where space is limited. With no ground track or swing space required, the gate helps overcome clearance and encroachment issues without the need to allow additional room for a traditional swing gate.

Easy to operate and suitable for a range of ground types, including grass, concrete and gravel, it provides a wide access opening of either 4m with a 2.4m fence panel or 5.8m with a 3.3m fence panel.

ENGINEERED TEMPORARY FENCING

At 1300TempFence, we've assisted on numerous major projects. Our systems are all tested and certified by third party engineering consultants. We ensure the necessary relevant engineering documents are provided to you throughout the quoting and installation stages of your project.

We have engineered bracing solutions that can service windspeeds up to 147km/h

WHY USE OUR ENGINEERED TEMPORARY FENCE?

All of our temporary fencing is tested to be compliant with the most current version of the Australian Standard for Temporary Fencing AS-4687:2022.

We have engineered different bracing solutions to suit multiple wind speeds, to service the minimum requirement of Stability Class fence at 54km/hr right up to **147km/h** depending on your site's specific requirements.

CAPABILITIES INCLUDE:

- More wind resistant than standard temporary fence
- Fully engineered system
- Certified by third party engineering consultants
- Designs specifically for shade cloth & printed mesh installations

SUITABLE FOR:

- Major road and infrastructure works
- Events
- Civil
- Industrial
- Government
- Residential and commercial

ACCESSORIES & ADD-ONS

SUPPORT STAYS

Providing extra bracing strength and anchors to help prevent temporary fence from falling.

HOOK STAYS

Providing extra bracing strength and anchors to help prevent temporary fence from falling.

SHADE CLOTH

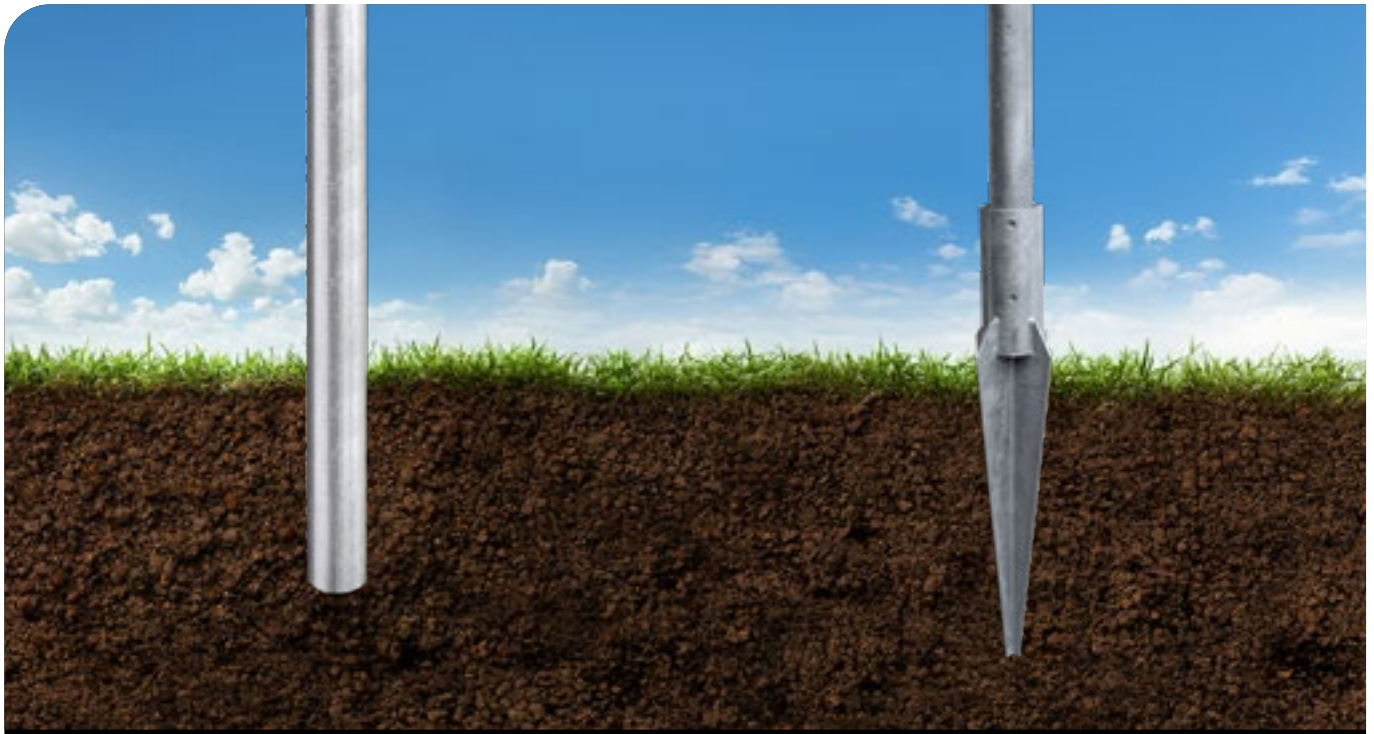

We offer a wide range of colours, densities and widths. Ask about wind proof options.

SEMI- PERMANENT FENCING

When you require something stronger and sturdier than normal temporary fence. Then you need our semi-permanent fencing.

Suitable for most civil, commercial, residential, major road and infrastructure works and large scale events and gatherings. We have two options available; Rammed Post and Spike Post.

RAMMED POST SYSTEM

Has thick walled posts which are driven into the ground, and clamped to the panels.

SPIKE POST SYSTEM

Features a spike which is driven into the ground first, with the pipe inserted into the spike's receiving slot.

Both systems are specially engineered and designed to withstand very harsh conditions and high wind forces. Speak to our friendly team of experts who can help advise which option is best suited for your site.

THE ADVANTAGES OF SEMI-PERMANENT FENCING ARE:

- No need to use temporary fence feet or bracing
- No tripping hazards
- No concreting required, no residual damage
- Stronger and sturdier than traditional temporary fence

ALTERNATIVE FENCING

At 1300TempFence, we also offer a range of alternative fencing options. So whether you're looking for a stylish presentation for an upcoming event, or need a temporary barrier solution for swimming pool safety, we have you covered.

With our unwavering commitment to OH&S and use of quality products we can provide unrivalled site security and safety solutions.

CAPABILITIES INCLUDE:

- Any size site, any hire period
- Fully engineered systems
- Night & weekend works

PROJECTS INCLUDE:

- Events
- Road & rail
- Water
- Bridges
- Ports
- Tunnels
- Energy
- Airports
- Sewers
- Residential
- Telecommunications

ALTERNATIVE FENCING OPTIONS

TEMPORARY PRESTIGE FENCING

Ideal for when a smarter presentation or extra security is required. Anti-climb vertical piping is a smarter looking alternative to a standard weld mesh temporary fence.

WHITE PICKET FENCING

High quality, stylish temporary event fencing. Low profile feet reduce the risk of tripping while maintaining safe crowd flow.

TEMPORARY POOL FENCING

Restrict and limit access to your pool area. Combine with our self closing temporary pool gate.*

*Should never substitute active supervision. Compliant with AS 4687:2022 - Swimming Pool Safety - Safety Barriers for Swimming Pools

PLASTIC SHEET FENCING

Providing full blockout, this is a convenient alternative to traditional plywood hoarding. Made from high density polyethylene.

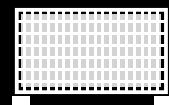

TEMPORARY KOALA FENCING

An effective solution to help protect native wildlife by preventing them from wandering onto roads and work sites.

**Not available in all locations.*

ADD-ONS

PRINTED FENCE BANNERS

A long lasting, high quality mesh. We can help with custom printing to provide maximum visual impact.

SAFETY SIGNAGE

Essential for any workplace, to provide heightened safety awareness for both employees and visitors. Indoor and outdoor use.

SMARTWALL

State of the art in design, the SmartWall utilises our temporary fence panel with a simple, yet effective, one-piece water filled barrier base.

Engineer certified to meet
stability class AS 4687:2022

SMART WALL

Our SmartWall features a compact, narrow design that minimises tripping hazards. The low profile prevents objects from sliding underneath and the sloping sides deter climbing. It's strong and durable, with a brightly colored base that ensures maximum visibility. Its sleek aesthetic makes the SmartWall ideal for high-profile sites where maximising the work area is essential.

FEATURES AND BENEFITS:

- Sleek aesthetic, ideal for high profile sites
- Narrow footprint, less encroachment on footpaths
- Easy to install or relocate with it's simple one-piece design
- Easy to lift handles on side and middle
- Cost effective transport, 36 SmartWalls = only 4 standard pallet spaces
- Low profile prevents anything sliding underneath
- Ideal for Infrastructure, Civil and Events

CROWD CONTROL BARRIERS

Managing a construction site or large scale Event? Crowd control barriers are a must for creating a safe and secure environment to maintain safe crowd flow.

Whether it's for employees, guests, or the general public; it's important to have the appropriate temporary fencing solution to suit your situation.

Over the years we have supplied crowd control barriers to festivals, concerts, exhibitions, sporting events and work sites. We have the expertise to ensure your work site or event is both safe and secure, keeping people away from potential hazards while ensuring the safe movement of people.

Our strong, sturdy and durable crowd control barriers are lightweight, with stable flat feet. To reduce the risk of tripping further, the feet have holes for pegging or dyna-bolting.

Our crowd control barriers are 2.2m wide x 1.1m high.

CAPABILITIES INCLUDE:

- Any size site, any hire period
- Fully engineered systems
- Night & weekend works

PROJECTS INCLUDE:

- Events
- Bridges
- Airports
- Road & rail
- Ports
- Sewers
- Water
- Tunnels
- Telecommunications
- Energy

LOOKING TO CREATE IMPACT?

We can also provide crowd control barrier slips and signage. We work closely with a team of experienced graphic designers who can ensure your site or event has the visual impact, improved safety and brand awareness. Interested? Chat to us today for more details.

ACCESSORIES & FINISHES

PEDESTRIAN GATE

Provides entrances and exits, ideal for public safety at events or work sites.

GALVANISED FINISH

Our galvanised crowd control barrier is ideal for events and public gatherings.

ORANGE FINISH

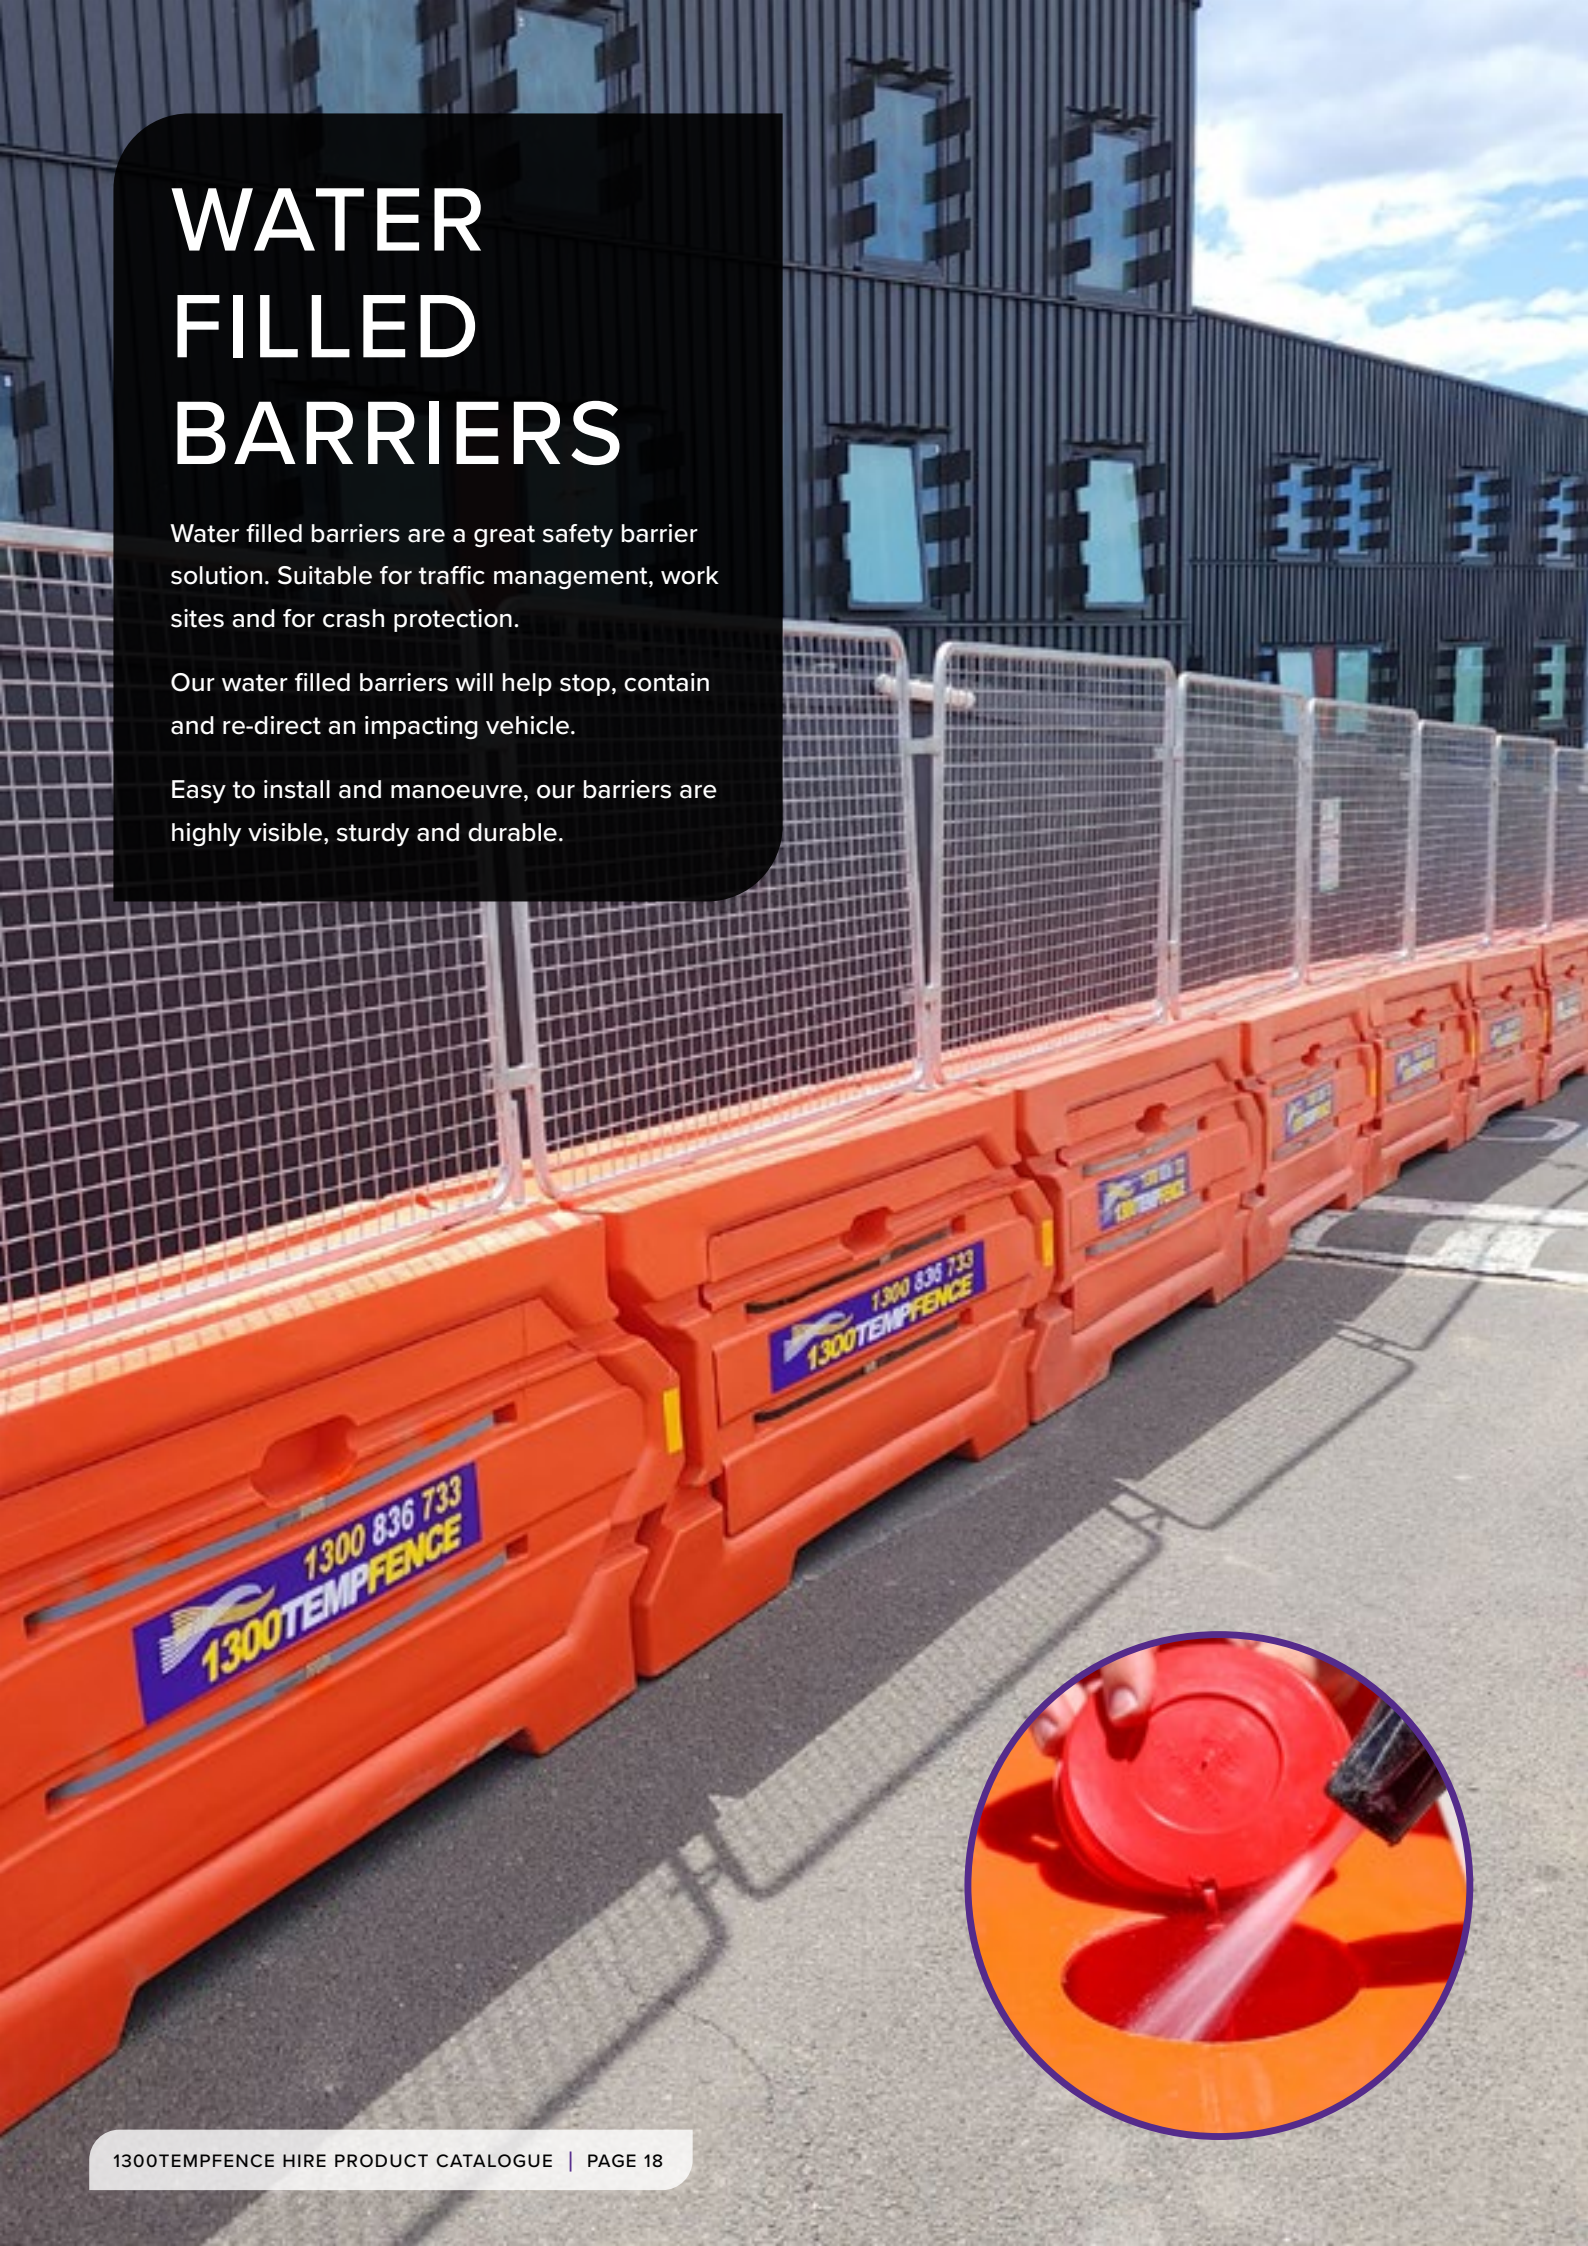

Provides high visibility for added safety hazard identification.

WATER FILLED BARRIERS

Water filled barriers are a great safety barrier solution. Suitable for traffic management, work sites and for crash protection.

Our water filled barriers will help stop, contain and re-direct an impacting vehicle.

Easy to install and manoeuvre, our barriers are highly visible, sturdy and durable.

SHIELD 1

This safety crash barrier is made from a patented composite design, utilising a high strength modified UV stabilised polyethylene.

This Australian made, re-directive barrier is approved by road authorities Australia wide. MASH test level 1 certified.

(2,270kg at 50km/h and 25° accepted dynamic deflection 2.2m)

KI 1000

Designed specifically as a pedestrian and low speed zone barrier. This barrier has a simple interlocking system that allows the barriers to remain connected while moving through angles up to 120° each way. Fitted with Class 1 reflective tape, these highly visible barriers have two apertures topside for the fitment of hazard lights, pole signage or extended mesh fencing. Complies with Australian Standard AS1742-3-2019 Traffic Control Devices for works on roads.

X-SITE

This heavy-duty pedestrian zone barrier is perfect for delineating crowd flow. Making it the ideal choice for road closures for events or construction sites where traffic management is in place. Easy to install, with a simple interlocking system.

ACCESSORIES & ADD-ONS

FENCE TOPS

Our water filled barriers can be fitted with extended mesh fence panels.

PRINTED BANNERS

Provides privacy while promoting your brand or event. Interested? Ask us for more details.

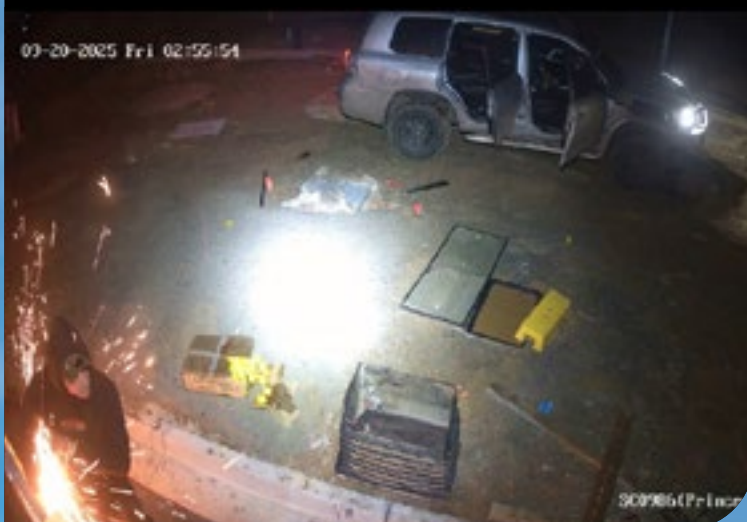

SITE SECURITY CAMERAS

1300SiteCam strives to offer the best in Site Security services. Our Solar/Wireless Security Camera Systems monitor and protect your site and assets, with 24/7 visibility. Take control and reduce your risk of theft and crime. Whatever your site requirements, we have a camera to suit your needs, with various installation options available.

SMART MOTION DETECTION

Our AI motion detection technology helps you to focus on human and vehicle events. The device will only trigger an alarm when the preset intrusion type (*human or vehicle*) takes place, videos related to alarm events are sorted into human and vehicle categories for easier footage searches.

TRAFFIC MANAGEMENT & GROUND PROTECTION

We offer ground protection solutions to prevent vehicles getting stuck in soft ground and steel road plates to keep roads safe.

We also offer a wide range of sales products that aid traffic management and work site safety through the sales arm of our business, Site HQ.

STEEL ROAD PLATES

Steel road plates have a variety of uses on construction sites, from driveway access for cars, large trench crossings for construction site traffic, to covering of pits in roadways. Compliant to Australian Standards, our steel road plates have a certified central lifting point and holes in each corner to aid safe and efficient handling. We have two options available: Construction Steel Plates and Road Plates (coated). Both options come in a range of sizes ranging from 25mm to 40mm in thickness.

GROUND PROTECTION MATS

Our ground protection mats (bog mats / track mats) protect grass and soft ground from tyres and prevent vehicles from getting stuck. They are moulded from a special grade of UV-stabilised recycled polyethylene resin which is designed for long outdoor life and durability. The material used allows the mats to flex without breaking even under the weight of a heavy truck, while being rigid enough to spread the wheel load. Our ground protection mats are 2400mm x 1200mm.

ACCESSORIES & ADD-ONS

To view more in our traffic management range visit sitehq.com.au

TRAFFIC CONES 700MM

Suitable for marking out hazards on the road, public area or work site.

TRAFFIC BOLLARDS & BASES

1150mm high with a 6kg 420mm x 420mm base.

SAFETY FLAGS / BUNTINGS

Ensure you have high visibility around your work site or hazard.

NOISE REDUCTION BARRIERS

(ACOUSTIC CURTAINS)

Noise reduction barriers are an essential element on construction projects to mitigate noise pollution emanating from the site. Allowing you to remain compliant and ensure noisy works are allowed to continue – even after hours and in residential areas.

Designed using world-leading acoustic technology, our noise reduction barriers, otherwise known as acoustic curtains, are made from high quality, lightweight materials, with the outer layer finished with water resistant PVC. Providing the most effective temporary sound solution, our noise reduction barriers protect employees and local communities from the harmful effects of excessive noise.

Our premium barriers are low centered to ensure noise can't penetrate beneath and with a strong insulated core they provide up to 20 decibels of sound absorption performance.

BENEFITS:

- Work in public spaces
- Use bigger machinery
- Conduct night works
- Reduce event generator noise
- Suitable for both indoor & outdoor use

SUITABLE FOR:

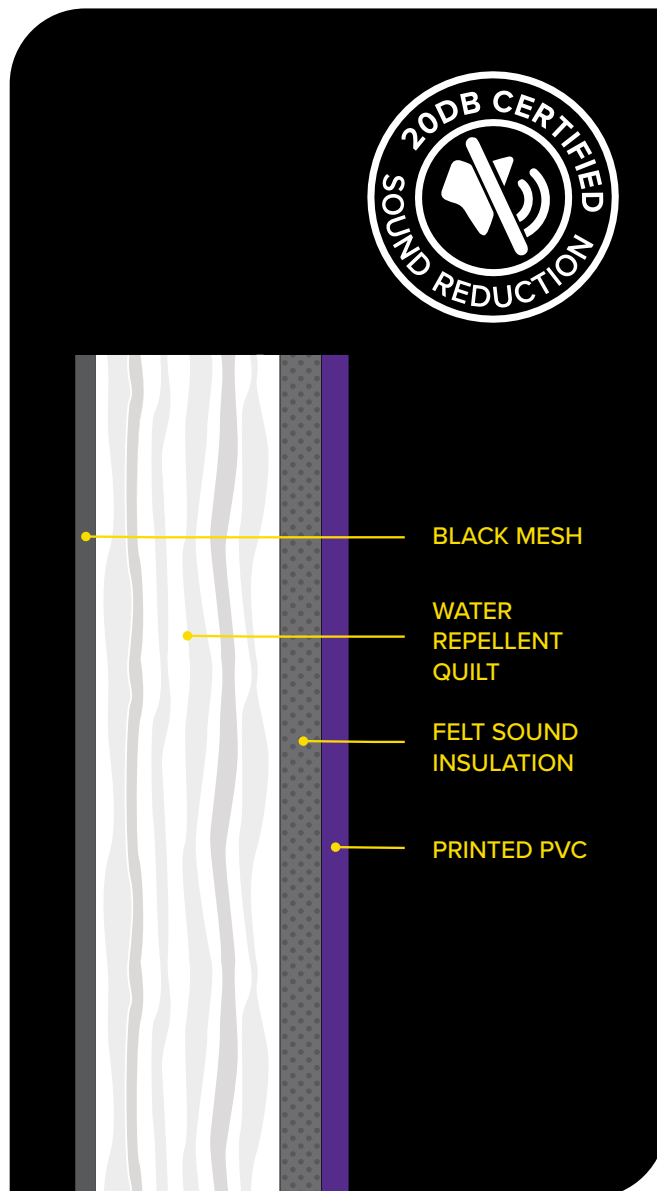

- Infrastructure projects
- Housing development sites
- Local events and much more...

INSTALLATION:

Our curtains are fitted with eyelets for easy attachment to temporary fencing/scaffolding on your site. They also come with a velcro strip securing each panel side by side for large scale noise reduction.

Scan the QR code to view our noise reduction barriers in action.

ACCESSORIES & ADD-ONS

SUPPORT STAYS

Providing extra bracing strength and anchors to help prevent temporary fence from falling.

HOOK STAYS

Providing extra bracing strength and anchors to help prevent temporary fence from falling.

CABLE TIES

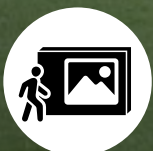

Packs of 100 available in a range of sizes to suit your needs.

HOARDING

1300Hoarding are specialists in the design and installation of robust, secure Engineer Certified Hoarding Systems. Providing unrivalled quality in construction, event and internal/retail hoarding.

Our experienced team have standard engineered designs ready to go and can advise on the best hoarding solution to suit your site including customised options and high quality finishes to ensure a sleek and professional look. All of our timber hoarding complies with local & state regulations, OH&S and is tested and certified to Australian Standards.

Our In-ground and Dynabolt Hoardings are compliant to AS1170.0:2002 & AS1170.2:2021. Wind Actions. Our Above-ground/Counterweight Hoardings are compliant to AS4687:2022 Temporary Fencing & Hoarding Parts 1 and 3.

WANT CUSTOM BRANDING?

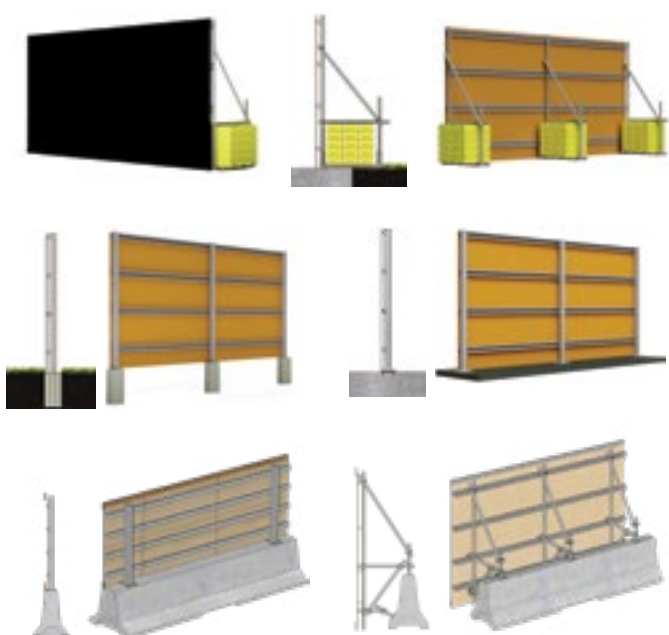

Our in-house team of qualified designers can help create decals, banners and signage to help promote your brand or event.

EXTERNAL HOARDING (A-CLASS)

Our robust, secure Engineer Certified Hoarding Systems options:

- Our In-ground and Dynabolt Hoardings are compliant to AS1170.0:2002 & AS1170.2:2021. Wind Actions.
- Our Above-ground/Counterweight Hoardings are compliant to AS4687:2022 Temporary Fencing & Hoarding Parts 1 and 3.
- Jersey Kerb Hoarding – where protection from potential vehicle impact is required
- Standard height up to 3 metres (can be customised)

To find out more about 1300Hoarding please visit 1300Hoarding.com.au

INTERNAL/ RETAIL HOARDING

1300Hoarding is the proud supplier of the Engineer Certified Titan Hoarding System. The market leader for indoor hoarding applications.

- Ideal for retail shopping centres, commercial offices and hospitals
- Where public access must be restricted
- Can be built free-standing to 7.2m high, eliminating damage to floors and bulkheads
- Seamless barrier to noise and dust

PORTABLE TOILETS

Portable toilets can be an essential requirement when you are running a construction site or event.

CRANE LIFTING HOOKS

Our toilets are engineer certified to be lifted by crane onto building sites.

PORTABLE TOILETS

We provide safe, comfortable and hygienic portable toilets that are modern in design, yet ergonomically friendly.

ACCESSIBLE PORTABLE TOILETS

Our wheelchair-accessible toilets are essential for events, to provide those with a mobility impairment or physical disability safe, convenient and comfortable access to a portable toilet.

All our toilets come with a fresh water flush for increased sanitation and cleanliness. Reducing the spread of waste and germs. We offer weekly, fortnightly, monthly on demand service and pump outs.

OH&S

OUR CONTINUAL POLICY

We take a responsible approach to the way we work and behave, both inside and outside our organisation. As a growing business, we know we have an impact on our colleagues, our customers, the environment and our local communities, as well as on wider society and the economy.

At 1300TempFence, our top priority is ensuring that our company is a safe environment for both our colleagues and our customers. We are committed to providing a workplace that meets high safety standards, while equipping our team with the necessary knowledge and equipment to protect themselves on the job. This commitment extends to delivering safe fencing solutions and installations to protect both the workers on site and the general public. We ensure all our installers are fully compliant.

We're committed
to providing our
customers with the
highest quality product
at all times. We strive
for excellence in
everything we do.

We provide assurance in the fact that our 1300TempFence temporary fencing has been tested and certified to fully comply with Australian Standard AS 4687:2022.

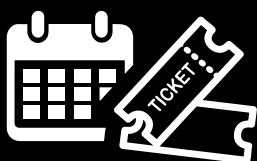

WHO WE'VE WORKED WITH

KEY PROJECTS

At 1300TempFence, we take pride in creating and nurturing our long-standing relationships with our valued customers. Some recent key projects include:

EVENTS

Australian Formula 1 Grand Prix (VIC)
LIV Golf (SA)
Holi Festival (NATIONAL)
Summernats (ACT)
AFL Gather Round (SA)

MAJOR PROJECTS

Melbourne Airport T5 (VIC)
Westgate Tunnel Project (VIC)
Alkimos to Wanneroo Desalination Pipeline Project (WA)
Sydney Grand Central Train Station (NSW)
MelconnX (Ellenbrook train line) (WA)

SPORTING EVENT CASE STUDY:

AUSTRALIAN FORMULA 1 GRAND PRIX

As the world focused on Melbourne for the Formula 1 Grand Prix, 1300TempFence was behind the scenes ensuring safety and security. As a trusted name in event infrastructure, we played a key role in supporting one of the globe's most prestigious sporting events. Over a three-month bump-in, we delivered a large-scale, high-security setup:

- **26.2km of temporary fencing (1.8m and 2.1m)**
- **9.6km of semi-permanent fencing (1.8m and 2.1m)**
- **4.82km of custom Formula 1 combo fencing**
- **1.9km of weedmat (1.8m and 2.1m)**
- **2.8km of razor wire loop for increased security**
- **3.8km of crowd control barriers (CCBs)**
- **28 KI100 barriers with toppers**
- **2 custom Formula 1 self-closing gates**
- **54 twin gate wheels and 8 standard gate wheels**
- **10 strategically placed site cameras**
- **149 acoustic curtains**

Despite a dynamic site and shifting demands, we stayed agile and efficient:

- **Rotating crew of 5 casuals + 9 subcontractors for flexibility**
- **Onsite Operations team for smooth coordination**
- **Proactive planning and strong team communication**

We delivered on time, to spec, and without disruption - reinforcing our reputation as one of Australia's top event fencing providers.

SPORTING EVENT CASE STUDY:

LIV GOLF

Returning for another year, the highly anticipated LIV Golf Adelaide event brought thousands of fans and top-tier athletes to South Australia. To ensure the event ran smoothly, 1300TempFence delivered a complete temporary fencing solution, supporting crowd control, security, and site organisation.

Planning began in December, with installations ramping up in early January. Our national Operations Team joined forces with our South Australian crew to handle the large-scale setup. We installed:

- **Just under 3km of semi permanent fencing**
- **Approximately 4.1km of 54K spec fencing**
- **Approximately 1.5km of standard temporary fencing**
- **Water filled barriers**
- **Prestige fencing**
- **White picket fencing**

Our fencing played a vital role in directing pedestrian traffic, securing restricted areas, and improving the spectator experience. With extensive experience across major sporting events, 1300TempFence once again delivered a safe, efficient, and professional result - on time and to the highest standards.

MAJOR PROJECT CASE STUDY:

ALKIMOS - WANNEROO PIPELINE

When Georgiou, in partnership with DM Civil, was selected to deliver the Alkimos to Wanneroo Desalination Pipeline Project, they engaged our Western Australian team for trusted site safety and security solutions.

Delivered in alliance with Water Corporation, the project involves designing, constructing, and commissioning 27.5km of a 33.5km below-ground pipeline to transfer drinking water from the future Alkimos Seawater Desalination Plant (ADSP) to the Wanneroo Reservoir via Carabooda Tanks-supporting Perth's long-term water supply. With works spanning multiple sites and tight deadlines, we provided a tailored solution that included:

- **11km of temporary fencing (with bracing every 6th panel)**
- **9 × 360° site security cameras (in-ground)**
- **1 × 180° camera**
- **1 × double turret camera**
- **6 × 360° cameras (above-ground)**
- **Site security monitoring**
- **8 portable toilets**
- **3km of silt fencing**

Working closely with alliance site crews to overcome access limitations, we completed all installations on time with zero disruption. Our strong site presence, clear communication, and flexible approach ensured a safe, efficient delivery that earned high praise for responsiveness, professionalism, and quality.

MAJOR PROJECT CASE STUDY:

MELBOURNE AIRPORT T5

Getting to Terminal 4 at Melbourne Airport is going to get faster and easier with the creation of a much-needed express road connecting the terminal to the freeway. One of our great clients, Seymour Whyte have been engaged as principal contractor to deliver the design and construction of this elevated road.

We're proud to be able to aid them in this important project, by supplying several engineered design solutions to suit this complex site. Including; 600mm rammed post semi-permanent fencing, 450mm jack hammered spike systems, KI 1000 delineation water barriers and Shield 1 TL-1 50km/h rated water barriers. To ensure the car park remains open to pedestrians and vehicles, while keeping everyone safe while construction is underway.

We look forward to seeing this major project progress and the creation of an improved traveller experience from freeway to runway.

HERE'S WHAT OUR CUSTOMERS HAVE TO SAY:

Thank you 1300TempFence.
You and your team's
contributions are immensely
appreciated, and we could
not have delivered such a
successful event for teams,
fans and staff without it.

MATTHEW WALTON

*Australian Grand Prix
Corporation
Australian Formula 1
